

Excellerate Check-In System

Streamline your check-in process. Track attendance. Feel confident.

It's time to take your check-in process to the next level. Put away the clipboards, paper attendance forms and all the aggravation that goes along with them.

Excellerate's Check-In System streamlines the whole process, eliminates the paperwork, and increases security.

- ✓ **No more waiting to check in**
- ✓ **Ultra-streamlined express mode**
- ✓ **Automatically tracks attendance**
- ✓ **Confidence with secure check-out**
- ✓ **Completely customizable**

USES

Child Check-In

In just a few seconds, parents can check in their children, receive name badges and security receipts, and attendance is automatically recorded in Excellerate.

Volunteer Check-in

Volunteers can check in as they arrive and receive name badges. Quickly see who's checked-in that day.

Event Check-in

Use the check-in system for events, youth services, or any type of meeting where you want to track attendance.

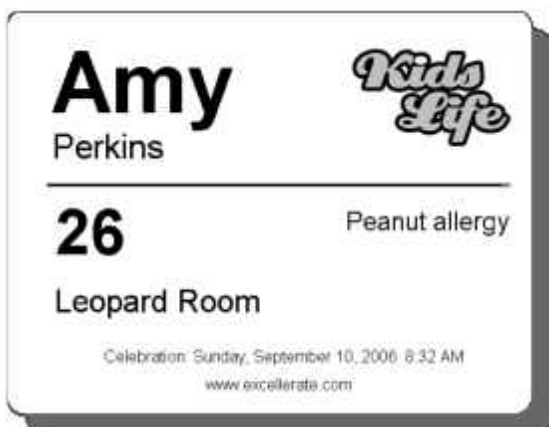

THREE DIFFERENT MODES

Express mode allows parents to simply scan the barcodes on key-tags (one for each child) and the child's name badge and check-in receipt print out immediately. This mode is extremely quick and simple, because the only equipment visible at the check-in station is the scanner and the printer. In this mode, check-in can be performed without any assistance from attendants.

Touch-screen mode allows parents to scan a barcode, or lookup their family using the touch-screen. Look-ups can be done by last name, or the last four digits of their phone number. Once the family is displayed on the screen, parents simply select the children to be checked-in. This mode can be run un-assisted as well.

Attendant mode allows a volunteer attendant to perform the check-in. No special equipment would be needed because the attendant can just ask the parents for their name or phone number to look them up, and select which children are checking in.

Name badges can be completely customized to show the information important to your church.

The fastest method of check-in uses barcodes printed on key-tags or cards. These barcodes can be printed from Excellerate, and placed on key-tags with your ministry logo.

Printing the barcodes from Excellerate makes it easy to issue new cards your self.

Works with remote facilities

For churches that hold services in remote facilities away from the office network, Excellerate check-in system can be run "offline". This allows you to run the check-in system un-connected from a network. Attendance can be stored on a portable USB drive, and synchronized with the main Excellerate database back in the office at a later time.

Fast

Parents no longer have to wait in line to check in their children, and miss part of the worship service. In just seconds, parents can have their children checked-in with a name badge, and security receipt.

Ensure the safety of your child

When checking in, a unique security number is printed on the name badge and security receipt. This receipt must be presented when picking up the child and matched up with the child's name badge to ensure a secure pickup.

Check-in at one location

The entire family can check-in at one location, saving time, rather than having to check-in at separate locations.

Call Numbers

Call numbers can be printed and used to notify parents if they are needed.

Special needs

Name badges include any special needs the child may have such as medicines, or allergies.

Completely customizable

Name badges and receipts can include pictures, barcodes, or special fields unique to your church.

Other features

Print item tags for bottles, bags, etc...

Customizable attendance reports

Attended or self check-in
