Completely customizable to fit your church

Every church is unique and shouldn't have to conform to rigid software. Excellerate is extremely customizable so it supports and enhances how you do church. It's almost like having software custom designed specifically for your church.

Very intuitive and easy to use

Excellerate was designed from the beginning to be very easy to use, so that even volunteers can jump right in and be productive right away.

Unbelievable tech support

We realize that every church is different, so our support team goes the extra mile in helping you get the exact information and analysis you need from Excellerate. We will even customize reports and views for you.

Send out mass emails to your members, leaders and visitors. Communicating with your congregation quickly is essential. With Excellerate's built-in emailing, you can send out mass emails to any selection of people in your database. You can easily notify your leaders of important events, meetings, needs, etc...

Small groups – Churches everywhere have discovered that small groups are extremely effective at reaching and discipling people, even more so as the church grows. The need for thorough small group tracking was the initial motivation for building Excellerate, that's why we have one of the most powerful, comprehensive small group tracking systems.

Visitor follow-up - Contacting new visitors within 24 hours greatly increases the chance of retaining them. Excellerate's follow-up system allows you to email visitor contact information to your leaders so they can contact the new visitors as soon as possible.

Proactive Leader Development - One key indicator of a successful church is that they are developing new leaders. Excellerate not only tracks your leadership development steps/classes, but also helps you be proactive by showing you who has completed step 1, but not step 2, so you can encourage them to take the next step.

Web Integration – Excellerate's web-integration links to your church website. This allows leaders to submit weekly small group reports or visitor follow-up results. No more dealing with paper forms or trying to read handwriting to do data entry.
